

## **Internship Engineering Cover Letter**

Dear **[Marry Clay]**,

Good day!

I am **[George Walton]** and I am currently completing my degree in Engineering from **[Chicago University]**. As part of my requirements to complete my degree, I am required to work **[200]** hours as an intern, and therefore, I am indicating my interest to work with your company this upcoming semester. Practical skills are necessary on top of the knowledge and skills that my studies have equipped me with, and it seems that your company is a good fit for me. This is why I am looking for an opportunity to work with **[HMT Ltd.]** in the upcoming semester.

Attached is a copy of my resume for you to review. Should you have any questions or clarifications regarding my academic performance, please do not hesitate to call or email me via the details provided. I look forward to speaking with you soon.

Sincerely,  
**George Walton**
