

Internship With No Experience Cover Letter

Dear [Mr. George],

I am writing this letter to apply for the [assistant researcher] summer internship position that was listed on the [Harvard University] website. I believe that my research skills and experience make me an ideal candidate.

I have had research experience in biology, chemistry, and physics, both in the laboratory and in the field. Most of my experience is in experimental field studies. I am currently conducting experiments regarding string theory and dark matter. I know that experience in the study of both theories is a component of the internship and I know that my experience makes me an excellent candidate for this.

I also worked as an experimental [physicist assistant] at [Harvard University] [Research Program]. I served as a research assistant for the research organization of the university. I believe that I would be an asset to your university. This internship will provide me with the opportunity to assist you and expand my research skills. I will call on [Monday] ([August 08, 2022]) to see if you would consider me for the position. I look forward to speaking with you.

Sincerely,

Andrew Gary
